S2: Support 2
 S1: Support 1
 R1: Resistance 1
 R2: Resistance 2

The levels indicated in the above table under the columns S2 and R2 are the indicated trading range for the particular day. One has to understand and follow that any drift below the S2 levels would negate the long side view on the stock while a breach above the R2 would negate the short side view on the stock.

If the view on a stock is indicated as long, one has to assume long positions around the S1 levels with a stop loss placed at S2 levels and similarly one has to assume short positions around the specified R1 levels and maintain a stop loss at R2 levels. For Example: If the view given on Infosys is long, then one has to observe the S1 levels to assume long positions and maintain a stop loss at the S2 levels. The targets for the same position would be in two tranches that is R1 and R2 levels.

Similarly, if the view given on Infosys is short, then one has to observe the R1 levels to assume short positions and maintain a stop loss at the R2 levels. The targets for the same position would be in two tranches that is S2 and S1 levels.
